METABOLISM ASSAY KITS

Elabscience specializes in immunodiagnostic technology for life science community, which has become a professional and reliable supplier of scientific research products through the unremitting efforts of employees. The products have passed ISO9001 and CE certification while widely being recognized by the (global) market and trusted by customers from more than 100 countries on 5 continents.

Elabscience has developed wide range metabolism assay kits to meet the requirements of researchers for rapid and efficient detections of biochemical indicators by simple operation, high sensitive and great performance during the year's innovation.

PRODUCT ADVANTAGE

QC system:

Strictly control from R&D to production and delivery of the kit;

Performance:

Intra-CV<5%, Inter-CV<1.0% ;Recovery rate :100±5%;R²: > 0.99;

Sample types:

Biological fluids,tissues,cell,plant,drug etc, providing sample reference dilution ratio;

Instrument requirements:

Spectrophotometer, Microplate reader, Fluorescence Microplate;

Research areas:

Oxidative stress, Liver and kidney function, amino acids and proteins, plant stress resistance and other fields;

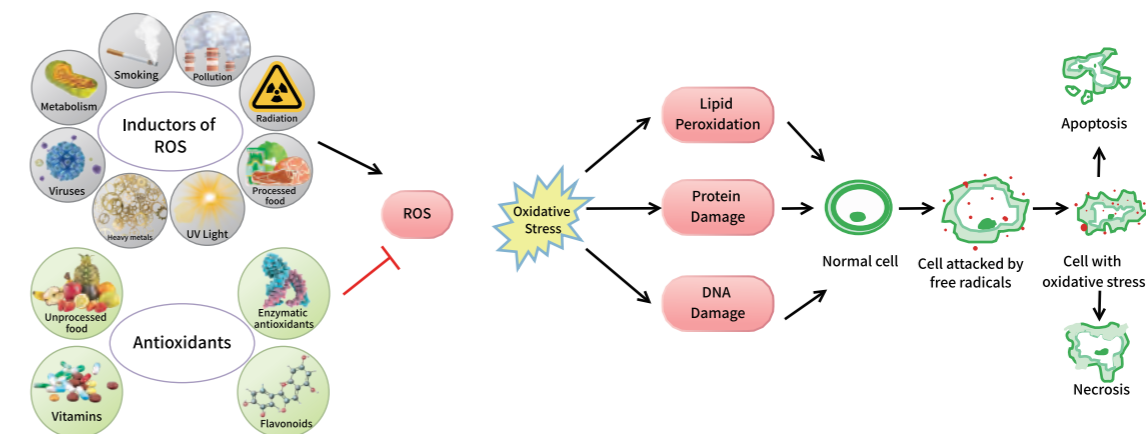

Tech support:

Professional team provides timely and efficient services, responding to all kinds of pre-sales/ after-sales questions in 24 hours;

OXIDATIVE STRESS

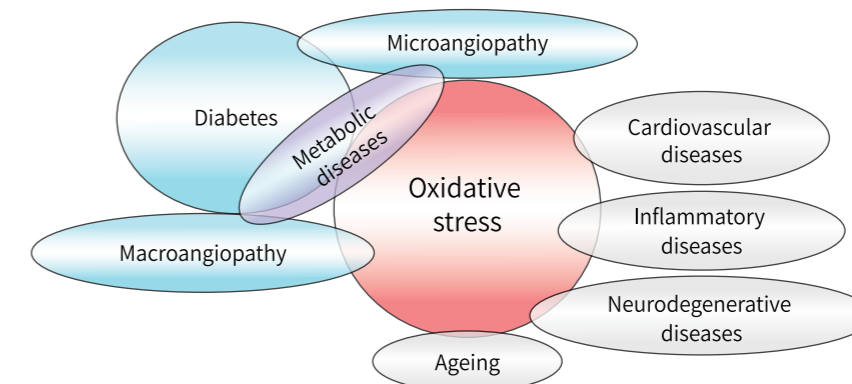

OXIDATIVE STRESS INTRODUCTION

Oxidative stress refers to the process of oxidative damage caused by the imbalance of the generation and clearance of oxygen free radicals in body or cells.

The occurrence and function of oxidative stress[1]

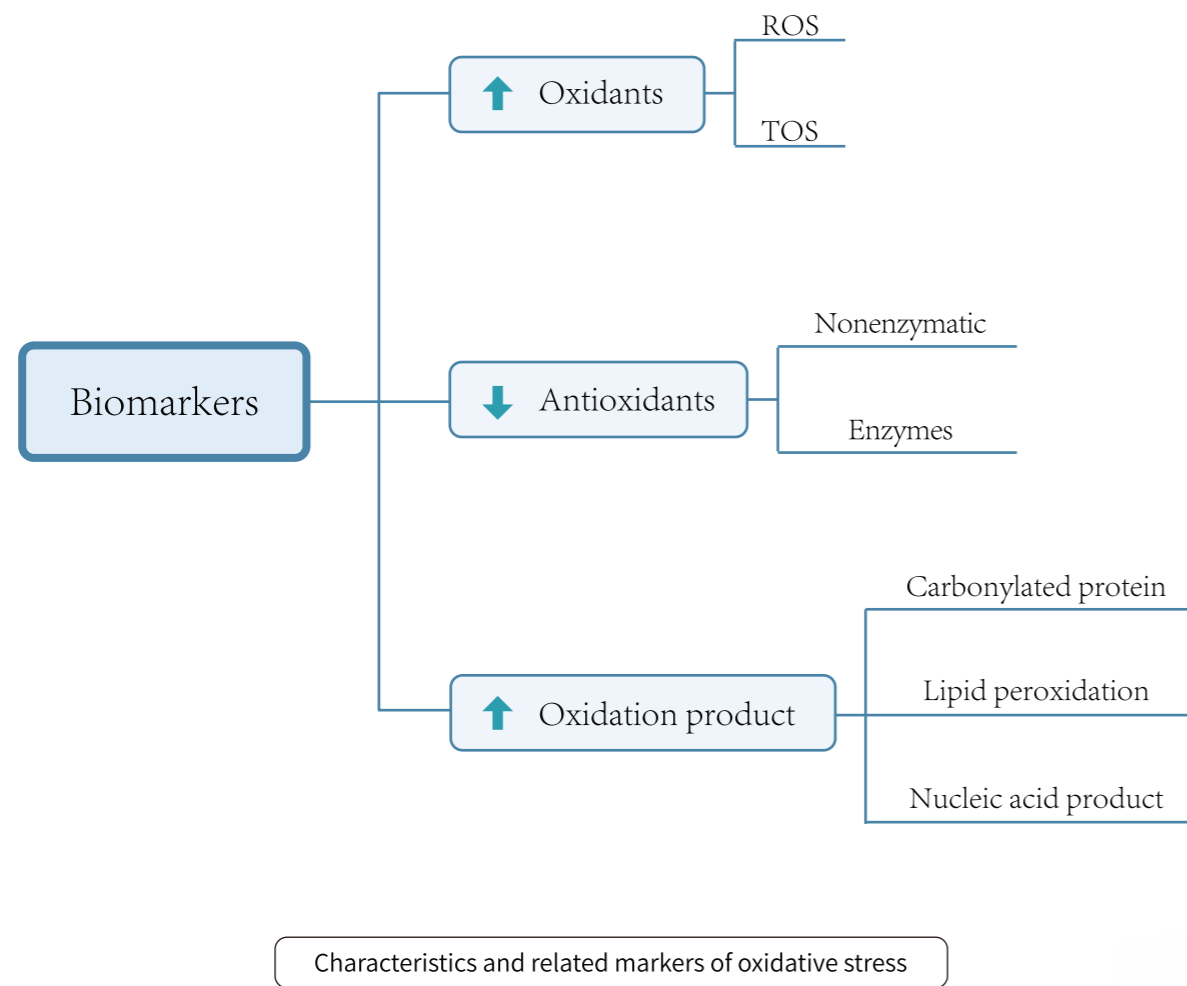

Oxidative stress promotes the occurrence and development of multiple diseases, such as cancer, cardiovascular disease, and diabetes. Oxidative stress is widely applied to medicinal and disease mechanism research.

Oxidative stress and related diseases[2]

OXIDATIVE STRESS ASSAY

When cells are subjected to oxidative stress, their oxidative capacity is enhanced while their anti-oxidant capacity is weakened. Oxidative stress can be evaluated by measuring the changes in the content of oxidants, oxidation products and antioxidant substances directly or indirectly. Elabscience has developed a variety of kits to accurately determine oxidative stress related metabolites such as reactive oxygen species, catalase, and lipid peroxides.

REACTIVE OXYGEN SPECIES

Reactive oxygen species (ROS) are some active chemicals produced in the process of metabolism, including oxygen free radicals and hydrogen peroxide. ROS is necessary to organisms but also harmful in certain circumstances. Excessive ROS is the main factor leading to oxidative stress, and so the related substances are the common indicators to evaluate oxidative stress.

ROS related kits

Marker	Product Name	Cat#
H ₂ O ₂	Hydrogen Peroxide (H ₂ O ₂) Fluorometric Assay Kit	E-BC-F001
	Hydrogen Peroxide (H ₂ O ₂) Colorimetric Assay Kit	E-BC-K102-M
ROS	Reactive Oxygen Species (ROS) Fluorometric Assay Kit	E-BC-K138-F
•OH	Hydroxyl Free Radical Scavenging Capacity Assay Kit	E-BC-K527-M
TOS	Total Oxidant Status (TOS) Colorimetric Assay Kit	E-BC-K802-M
XOD	Xanthine Oxidase (XOD) Activity Fluorometric Assay Kit	E-BC-F019
O ₂ ^{-•}	Inhibition And Production Of Superoxide Anionic Colorimetric Assay Kit	E-BC-K001-M
NO	Nitric Oxide (NO) Colorimetric Assay Kit	E-BC-K035-M
	Nitric Oxide (NO) Colorimetric Assay Kit	E-BC-K035-S

Product presentation

◆ Hydrogen Peroxide (H₂O₂) Fluorometric Assay Kit (E-BC-F001) ◆

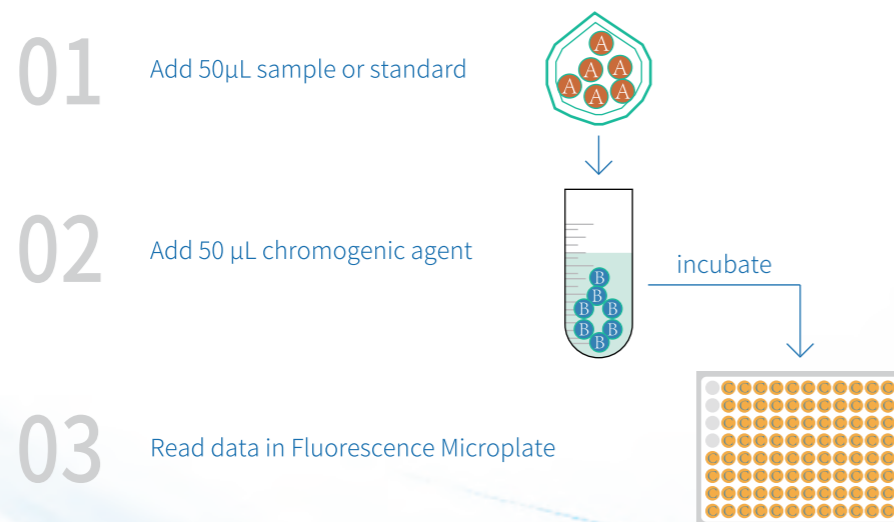

① Sensitivity: 0.02 μmol/L

② Specificity: detection principle of “Enzyme+ fluorescence probe”

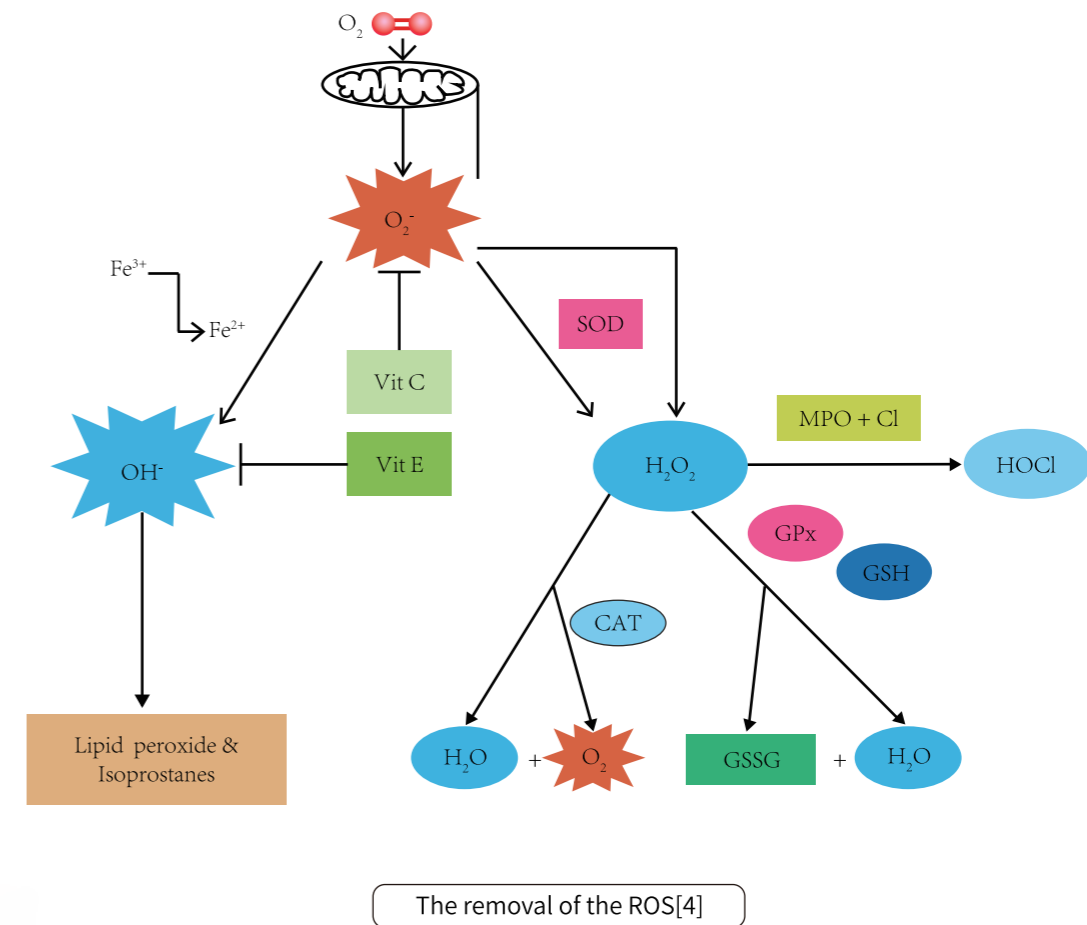

③ Operating steps: result can be detected after 2 steps

ANTIOXIDANT CAPACITY

There is a set of antioxidant mechanisms in organism to maintain the balance of ROS in the body. The ROS clearance mechanisms can be roughly divided into enzymatic antioxidants and non-enzymatic antioxidants. Measuring the levels of antioxidant including superoxide dismutase (SOD), catalase (CAT), glutathione peroxidase, and non-enzymatic antioxidants including glutathione, vitamins can assess the status of oxidative stress.

The removal of the ROS[4]

Antioxidant capacity kit

Marker	Product Name	Cat#
CAT	Catalase (CAT) Activity Fluorometric Assay Kit	E-BC-F006
	Catalase (CAT) Activity Assay Kit	E-BC-K031-M
MPO	Myeloperoxidase (MPO) Peroxidation Activity Fluorometric Assay Kit	E-BC-F013
	Myeloperoxidase (MPO) Activity Assay Kit	E-BC-K074-M
T-SOD	Total Superoxide Dismutase Activity Assay Kit (WST-1 Method)	E-BC-K020-M
POD	Peroxidase (POD) Activity Assay Kit (Plant Samples)	E-BC-K227-M
GSH	Reduced Glutathione (GSH) Colorimetric Assay Kit	E-BC-K030-M
APX	Ascorbate Peroxidase (APX) Activity Assay Kit	E-BC-K353-S
GSH-Px	Glutathione Peroxidase (GSH-Px) Activity Assay Kit	E-BC-K096-M
GST	Glutathione-S-Transferase (GST) Activity Assay Kit(DTNB method)	E-BC-K800-M
T-GSH	Total Glutathione (T-GSH) Colorimetric Assay Kit	E-BC-K097-M
Total Thiol	Total Sulfhydryl Group/Total Thiol (-SH) Colorimetric Assay Kit	E-BC-K265-M
VE	Vitamin E (VE) Colorimetric Assay Kit	E-BC-K033-M
VC	Vitamin C (VC) Colorimetric Assay Kit	E-BC-K034-M
T-AOC	Total Antioxidant Capacity (T-AOC) Colorimetric Assay Kit	E-BC-K136-M
	Total Antioxidant Capacity (T-AOC) Colorimetric Assay Kit (ABTS)	E-BC-K271-M
TAS	Total Antioxidant Status (TAS) Colorimetric Assay Kit	E-BC-K801-M
Flavonoids	Plant Flavonoids Colorimetric Assay Kit	E-BC-K284-M
Total Phenols	Total Phenols Colorimetric Assay Kit (Plant samples)	E-BC-K354-M

Product presentation

◆ Total Superoxide Dismutase(T-SOD) Activity Assay Kit (WST-1 Method) (E-BC-K020-M) ◆

① Product feature

- ☑ Sample volume: 0.02 mL/well
- ☑ Reaction time: 20 min
- ☑ Sample size: 92 sample/96T

② Application

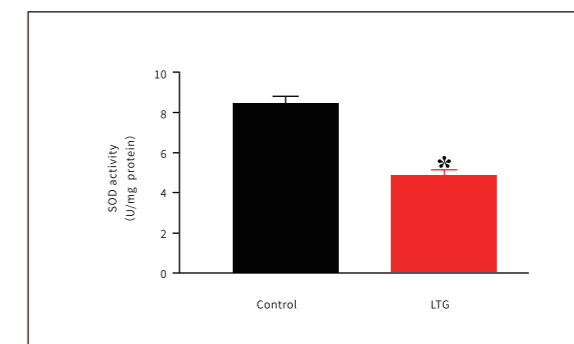

a) Disease mechanism research

Sample type: rat liver

Resources: Wong S K, Chin K, Ahmad F., et al. Biochemical and histopathological assessment of liver in a rat model of metabolic syndrome induced by high - carbohydrate high - fat diet[J]. Journal of Food Biochemistry, 2020, 44.

b) Drug evaluation

Sample type: mouse brain

Resources: Abubakar K, Mailafiya M M, Danmaigoro A, et al. Curcumin Attenuates Lead-Induced Cerebellar Toxicity in Rats via Chelating Activity and Inhibition of Oxidative Stress[J]. Biomolecules, 1801, 9(9).

OXIDATION PRODUCTS

Lipid peroxidation

Lipid peroxidation is the oxidation of carbon-carbon double bonds in lipids by reactive oxygen species to form unsaturated lipids. The products of lipid peroxidation are Malondialdehyde (MDA) and 4-hydroxynon-enal (HNE). Lipid peroxidation damages the biofilm and its function by changes in cell membrane fluidity and permeability, and ultimate changes in cell structure and function.

Lipid peroxidation kit

Marker	Product Name	Cat#
MDA	Malondialdehyde (MDA) Colorimetric Assay Kit (TBA Method)	E-BC-K025-M
	Malondialdehyde (MDA) Colorimetric Assay Kit (TBA Method)	E-BC-K025-S
	Malondialdehyde (MDA) Colorimetric Assay Kit (Plant Samples)	E-BC-K027-M
	Malondialdehyde (MDA) Colorimetric Assay Kit (Plant Samples)	E-BC-K027-S
	Malondialdehyde (MDA) Colorimetric Assay Kit (Cell Samples)	E-BC-K028-M
TBARS	Thiobarbituric Acid Reactants (TBARS) Colorimetric Assay Kit	E-BC-K298-M
	Thiobarbituric Acid Reactants (TBARS) Colorimetric Assay Kit	E-BC-K298-F
LPO	Lipid Peroxide (LPO) Colorimetric Assay Kit	E-BC-K176-M

Product presentation

◆ Malondialdehyde (MDA) Colorimetric Assay Kit (TBA Method) (E-BC-K025-M) ◆

MDA is one of the final products of lipid peroxidation in cell membrane. TBA method is the classic principle for MDA determination.

① Product feature

- ☑ Sample volume: 20 μL/well
- ☑ Sample processing: Supernatant can be determined directly after homogenization
- ☑ Reaction time: 40 min

② Application

Disease mechanisms

Sample type: rats hippocampal tissue
 Resources: Messiha B, Ali M, Khattab M M, et al. Perindopril ameliorates experimental Alzheimer's disease progression: role of amyloid β degradation, central estrogen receptor and hyperlipidemic-lipid raft signaling[J]. Inflammopharmacology, 2020.

Protein oxidation

Protein oxidation is the oxidation of amino acid side chains by free radical to produce proteins containing carbonyl groups. Protein carbonyl is a biological indicator of oxidative stress, and the degree of protein oxidation can be estimated indirectly by measuring the content of protein carbonyl.

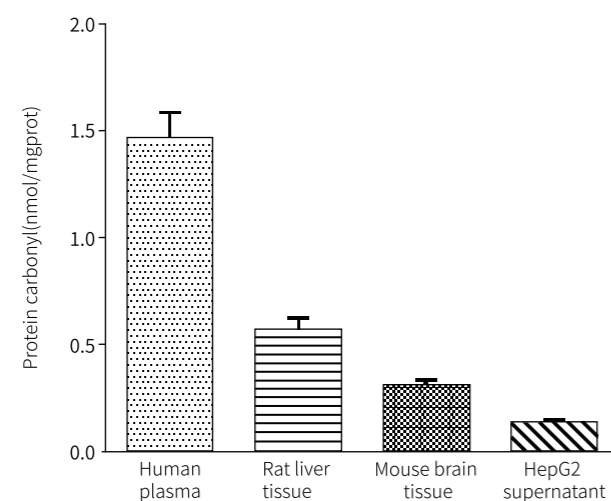

Carbonyl derivative structures produced by direct oxidation of amino acid side chains[6]

Protein oxidation kit

Marker	Product Name	Cat#
Protein Carbonyl	Protein Carbonyl Colorimetric Assay Kit	E-BC-K117-M
	Protein Carbonyl Colorimetric Assay Kit	E-BC-K117-S

Product presentation

◆ Protein Carbonyl Colorimetric Assay Kit (E-BC-K117-M) ◆

Sample validation

Detect human plasma (dilute for 10 times, the concentration of protein in sample is 0.43 mgprot/mL), 10% rat liver tissue homogenate (dilute for 2 times, the concentration of protein in sample is 0.29 mgprot/mL), 10% mouse brain tissue homogenate (the concentration of protein in sample is 0.23 mgprot/mL) and HepG2 supernatant (the concentration of protein in sample is 0.35 mgprot/mL) according to the protocol.

PRODUCTS EXPLANATION

Product item

Spectrophotometer

E-BC-K000-S

In which the letter "S" is the initial letter of the Spectrophotometer, on behalf of the applicable instrument is UV-visible Spectrophotometer.

ADVANTAGE:

- Low operating cost;
- Widely wavelength range;
- High sensitivity.

Microplate reader

E-BC-K000-M

In which the letter "M" is the initial letter of the Microplate, on behalf of the applicable instrument is Microplate reader.

ADVANTAGE:

- Small sample volume;
- Simple to operate;
- Rapid detection.

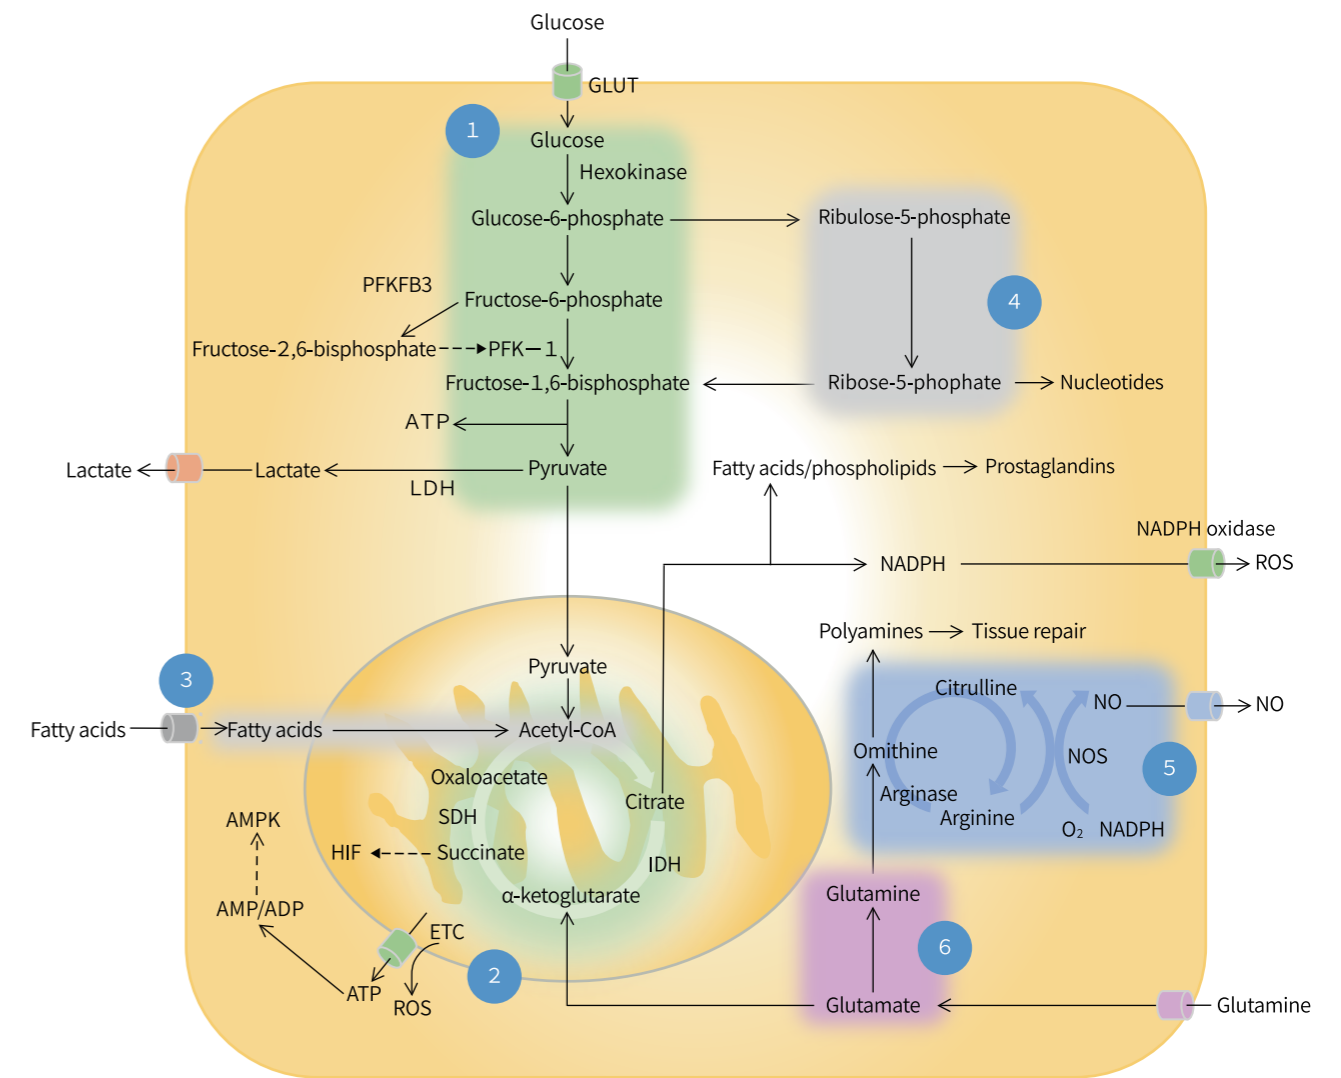

Fluorescence microplate reader

E-BC-F000

In which the letter "F" is the initial letter of the Fluorescence, on behalf of the applicable instrument is Fluorescence microplate reader.

ADVANTAGE:

- High specificity and sensitivity;
- Small sample volume.

The interrelationship of carbohydrate, lipid, protein and nucleic acid metabolism
