

MHC & TCR

MHC Monomers & Tetramers,
Peptide-Ready MHCs, & Soluble
TCR Expression

High Binding Affinity MHC Monomers & Tetramers

MHC Tetramers with High Binding Affinity via SPR

(Right) Our Peptide-MHCs demonstrate high binding affinity to neoantigen antibodies. Here we demonstrate Anti-NY-ESO-1 (HLA-A*02:01) Antibody, hFc Tag captured on CM5 Chip via Protein A binds Human NY-ESO-1 (HLA-A*02:01) Tetramer, His Tag with an affinity constant of 0.09 nM as determined via SPR assay (Biacore T200).

Human NY-ESO1 (HLA-A*02:01) Tetramer, His Tag ELISA

0.5µg Human NY-ESO-1 (HLA-A*02:01) Tetramer, His Tag Per Well

High Bioactivity with Mammalian and E. Coli Expression

(Left) KACTUS Peptide-MHCs demonstrate both quality and versatility. As verified by ELISA, the activity of NY-ESO-1 (HLA-A*02:01) tetramer is comparable with both mammalian and E. coli expression.

Log Anti-NY-ESO-1(HLA-A*02:01) Antibody, hFc Tag Conc. (µg/ml)

Engineering the Expression of Peptide-MHCs

High-Performance MHCs using Mammalian Expression to Ensure Natural Folding & Complete Glycosylation.

We use HEK293 mammalian expression systems for our MHC products to ensure protein post-translational modifications including glycosylation and disulfide bond formation. Our proprietary design of MHC molecules reduces the chance of undesired displacement of peptides, allowing for more accurate and reliable detection of antigen-specific T cells and greater suitability for immunization.

MHC Monomers
& Tetramers:

150+ Catalog Products

Mammalian & E. coli Expression

Greater than 95% Purity

Human, Mouse, & Cynomolgus

High bioactivity verified by ELISA & SPR

Fluorescent Labeling & Biotinylation

High Binding Affinity

High Specificity

Batch-to-Batch Consistency

Low Endotoxin

Various Alleles

Available Neoantigens

AFP
gp100
HBV
HPV16 E6

HPV17 E7
KRAS
KRAS (G12D)
KRAS (G12V)

LMP2
MAGE-A3
MAGE-A4
NY-ESO-1

p53
P53 (R175H)
PRAME

Survivin
Survivin 2B
WT-1

Looking for a different neoantigen? Contact our team at sales@kactusbio.us to request a custom MHC.

Product Types

Peptide-ready MHC

pMHC monomer

pMHC tetramer

pMHC multimer on VLPs

Fluorescent pMHC tetramer (SA assembly)

Fluorescent pMHC tetramer (in vivo tetramerization)

Fluorescent pMHC multimer on VLPs

Chimeric pMHC

Heavy chain

Peptide

β 2m

Biotin

Fluorophore

VLPs

Custom MHC Production Services

Choice of:

- MHC monomer
- MHC tetramer
- Chimeric peptide-MHC
- MHC virus-like particle
- Peptide-ready MHC
- Peptide loading services

Modifications:

- MHC class I or II allele
- Neoantigen sequence
- Biotinylation
- Fluorescent labeling (PE, FITC, APC, etc.)

Receive a customized MHC in 6-8 weeks!

Soluble TCR Expression Services

- Production of various formats of soluble TCRs, including scFv-TCR, TCR-His, etc.
- TCR engineering to optimize soluble TCR expression based on TCR modeling
- SPR analysis of soluble TCR & MHC interactions

Soluble TCR

Example Validation: Expressed gp100 TCR & Anti-CD3 Bispecific Fusion Protein binds to Human gp100 Peptide-MHC Monomers & Tetramers.

gp100 TCR & Anti-CD3 Bispecific Fusion, His Tag ELISA
0.05µg gp100 TCR & Anti-CD3 Bispecific Fusion, His Tag Per Well

Log Biotinylated Human HLA-A*02:01β2M&gp100, His Tag Conc. (µg/ml)

gp100 TCR & Anti-CD3 Bispecific Fusion, His Tag SPR

*In ELISA (left) and SPR (right) analyses, gp100 TCR & Anti-CD3 Bispecific Fusion Protein can bind to both monomers and tetramers of Human GP100 (HLA-A*02:01) complex, with an EC50 and affinity constant of 11.8 ng/mL and 0.196 nM, respectively.*

Soluble TCR
Expression Services

Peptide-Ready MHCs

Our functional Peptide-Ready MHCs products are a ready-to-use loading system for loading neoantigen peptides to form a new complete MHC peptide complex.

- Protocol for peptide-loading
- > 95% Purity
- Low Endotoxin
- Monomers & Tetramers
- Mammalian Expression

Contact sales@kactusbio.us to request a custom Peptide-Ready MHC.

Applications:

- High-throughput screening of specific neoantigen peptides
- TCR affinity studies and high-throughput characterization
- MHC binding studies
- Specific TCR or antigen-reactive T cell screening
- Peptide-MHC library construction
- Antigen epitope analysis and screening

TCR cells + KACTUS APC-equivalent Human MHC Tetramer (negative control)

TCR cells + Competitor PE-labeled Human NY-ESO-1 (SLLMWITQC) & HLA-A*02:01 & β2M Tetramer

TCR cells + KACTUS APC-equivalent Human NY-ESO-1 (SLLMWITQC) & HLA-A*02:01 & β2M Tetramer

*Demonstrated via FACS assay, fluorescent-labeled Human Peptide-Ready HLA-A*02:01&β2M Tetramer loaded with peptide (SLLMWITQC) can bind with HLA-A*02:01&β2M&NY-ESO-1 TCR cells.*

Peptide-Ready MHC Catalog List

Allele Subtype	Type	Expression	Species	Tag	Catalog #
HLA-A*11:01	Monomer	HEK293	Human	C-His-Avi	MHC-HM41R
